

University Drive Bridge Concept Layout

The new pedestrian bridge will be located northeast of the University Drive Bridge and connected to existing sidewalks.

Purpose of the project:

The University Drive realignment project will include a new intersection near US 63 and 12th Street/Miner Circle that will improve safety and be the gateway to the City of Rolla.

Schedule for project:

Scheduled for completion in 2020

Benefits of project:

The University Drive realignment will provide a safe and convenient environment for vehicles, bicyclists and pedestrians to address the high number of incidents along US 63 and will minimize the number of pedestrian/vehicle conflict points along US 63. In addition, the new road will connect I-44 and US 63 / Miner Circle to provide an improved gateway for the City, as well as improved access to the university and the Phelps Health Campus.
